SUPPLEMENTARY INFORMATION:

Authority for this Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part, A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it modifies Class D airspace at Grissom ARB, Peru, IN.

History

On June 6, 2016, the FAA published in the **Federal Register** a notice of proposed rulemaking (NPRM) to modify Class D Airspace to allow for a lower Circling Minimum

Descent Altitude at Grissom Air Reserve Base (ARB), IN (81 FR 36214) FAA-2016-6006. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Class D airspace areas are published in paragraph 5000 of FAA Order 7400.9Z, dated August 6, 2016, and effective September 15, 2015, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Availability and Summary of Documents for Incorporation by Reference

This document modifies FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2016, and effective September 15, 2015. FAA Order 7400.9Z is publicly available as listed in the ADDRESSES section of this document. FAA Order 7400.9Z lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This action modifies Title 14, Code of Federal Regulations (14 CFR), Part 71 by modifying Class D airspace at Grissom ARB, IN, to within a 5.8- mile radius of the airport. This increase will allow for a lower Circling Minimum Descent Altitude, where Instrument Flight Rules Category E circling procedures are being used. Also, this action adds Peru, Grissom Air Reserve Base, IN, to the subtitle of the airspace designation. Controlled airspace is needed for the safety and management of IFR operations at the airport.

Class D airspace areas are published in paragraph 5000 of FAA Order 7400.9Z, dated August 6, 2016, and effective September 15, 2015, which is incorporated by

reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures,” paragraph 5-6.5a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exists that warrant preparation of an environmental assessment.
